Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. The response filed December 17, 2004 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Applicant remarked that the phrase "such that gravity exerts a downward force on the first fluid" is both "particular" and "distinct" and is technically accurate. Applicant further remarked that there is no need nor any requirement to make stylistic changes. In view of applicant's remarks, the objection is withdrawn. The phrase has been considered nothing more than stylistic and not further defining the claims.

Claim Objections

4. Claim 13 is objected to because of the following informalities: it appears that claim 13 should depend from claim 12. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. Claims 1-5, 8, 9, 11, 12, 14-17, 19-21, 23-25, 27-29, 31-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Norman (4,878,619).

Norman discloses a spraying device comprising a cartridge 10 and a sprayer body 12. The sprayer body 12 comprising: a conduit 80; a movable valve 82; a manual actuator 76; an orifice 28/34.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 10, 13, 18 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Norman (4,878,619).

Regarding claim 10, Norman discloses the limitations of the claimed invention with the exception of the cartridge being made of flexible plastic. Office notice is given flexible plastic. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have made the cartridge of Norman from flexible plastic to prevent corrosion.

Regarding claim 13, Norman discloses the limitations of the claimed invention with the exception of the check valve having a duckbill portion and an umbrella portion. Office notice is given a check valve having a duckbill portion and an umbrella portion. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have replaced the check valve of Norman with a check valve having a duckbill portion and an umbrella portion to provide an integral/one piece check valve.

Regarding claims 18 and 26, Norman discloses the limitations of the claimed invention with the exception of the anti-siphon unit. The specification, on page 5 paragraph 26, provides that anti-siphon units are well known. It would have been

obvious to a person having ordinary skill in the art at the time of the invention to have provided an anti-siphon unit to the device of Norman to prevent back flow.

8. Claims 6, 22 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Norman (4,878,619) in view of Packard (2,991,939).

Norman discloses the limitations of the claimed invention with the exception of the metering disc. Packard discloses a metering disc 55. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided the metering disc of Packard to the device of Norman to regulate the flow.

Response to Arguments

9. Applicant's arguments with respect to claims 1-6 and 8-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

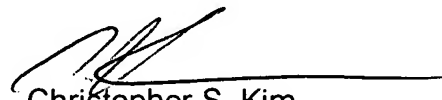

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
